

# All Wisconsin Residents Can Now Use VaccineFinder.org to Find a COVID-19 Vaccination Site

With almost 38% of Jefferson County residents having received at least one dose of a COVID-19 vaccine, Jefferson County Health Department is proud of our progress and hopes that community members will make their COVID-19 vaccination appointment as soon as possible to continue our recovery to normal. Visit our [COVID-19 Dashboard](#) to register by clicking [here](#).

Wisconsin Department of Health Services (DHS) is now using [VaccineFinder](#) going forward to help people locate available vaccine in their community and to connect with a vaccine provider. The Centers for Disease Control and Prevention (CDC) launched the [VaccineFinder](#) tool in March to help provide vaccine clinic information in a simple, easy format and to promote getting vaccinated for COVID-19.

[VaccineFinder](#) can provide the following information to users:

- Days and hours of COVID-19 vaccination clinics
- Search filter by vaccine type
- Search by zip code with radius adjustment
- View which vaccine providers have vaccine in stock

Only sites that are open to the public will display. There may be additional vaccination clinics that do not display on the [VaccineFinder](#) website.

Data populating [VaccineFinder](#) is maintained by DHS and generated through surveys sent to all vaccine providers in the state. Vaccinators can update their public information or turn on/off their profile by submitting changes to the [Provider Profile Correction Survey](#) found on the [DHS Vaccinator webpage](#).

The current DHS map of COVID-19 vaccine providers on the DHS website will be removed on April 29.
